

SEVENTH UNDERWATER COMMUNICATIONS AND NETWORKING CONFERENCE

UComms'24

Sestri Levante, Italy • September 3-5, 2024

Call for Papers: 17 May 2024 Deadline

The UComms conference series is dedicated to expand the common knowledge in underwater communications. From the intricacies of the various communication channels to network protocols, 6G, IoT, Quantum communications and the thrill of experimentation, UComms is at the forefront of maritime communications research.

Hosted by the NATO Centre for Maritime Research and Experimentation (CMRE), UComms welcomes experts, innovators, and practitioners involved in the research, development, implementation, and operational use of underwater communications systems.

We are calling for original contributions that push the boundaries and propel the state-of-the-art in underwater communications. We value disruptive ideas and innovative approaches that challenge the status quo.

Contributions will be in the form of short papers (no more than 4 pages plus references) that will undergo rigorous peer review by an international technical committee. Accepted and presented papers will be made available in conference proceedings with the intention to publish online in IEEE Xplore.

Papers may also be later expanded into a full article for submission to the IEEE Journal of Oceanic Engineering.

The conference will have structured sessions (single track) organised by leaders of the field that will ensure a high technical standard.

Important Dates:

Submission opens: March 2024

Deadline for submissions: 17 May 2024

Provisional acceptance notification: 24 June 2024

Registration opens: 24 June 2024

Revised manuscript deadline: 15 July 2024

Final copy deadline: 5 August 2024

Conference: 3-5 September 2024
